Game Description:

Clock-O-Dial™ was developed by educators to teach how to tell time in sequential order of skills.

To the hour

To the half hour

To the quarter hour

To the minute

Concepts before and after the hour

Digital and analog times

Four two-sided wheels provide 96 different ways to identify time on both analog and digital clocks.

Clock-O-Dial™ teaches students to tell time. When "7:30" appears in the window, kids set the hands, then open the sliding door to see the correct answer! It has been proven effective in classrooms nationwide.

See the question in the window.

Set the hands of the clock to show the answer.

Open the sliding door to see the correct setting.

Close the door to advance to the next question.

The self-checking design provides immediate reinforcement.

Clock-O-Dial's large numbers are easy to read. Its tough, high impact construction is designed to last. A teacher's guide includes easy-to-follow directions and ideas for time-telling activities.
